Why Cliove Anti-Aging Keratin ?

Define a Curl ,Control Frizz or Reduce Curls

Cliove uses 100% Organic Oils in order to restore and maintain your hair's healthy glow from within.

There is nothing better than using some of nature's gifts to nourish and care for your hair. Sure, we've all heard of the wonders of coconut and argan oils. These oils have become essential ingredients to most professional hair care lines. However, olive oil seems to be a secret, a hidden gem that has been used for thousands of years.

Our Organic Olive oil imported from Israel, is made up of components that soften and strengthen your hair, allowing it to be used for protection against heat, UV rays and more. It moisturizes your ends, helping to prevent breakage and frizz, it helps moisturize the scalp, and is also a good source of antioxidants, which removes damaging free radicals from the external part of your hair follicle and scalp. The benefit of protecting the follicle is to prevent premature aging that causes hair loss. By adding olive oil to hair treatments, it coats the outer layer of your hair, which makes it look smooth, shiny, healthy and improves elasticity.

**Our Keratin Activate
By Certified Organic
Argan, Coconut and Olive Oils**

Argan oil is a great moisturizer and can be used to fight both dandruff and dry scalp because it's extraordinarily high in vitamin E and antioxidants.

Coconut oil is rich in vitamins c, and minerals and It has been in use as hair oil for thousands of years, and it has shown remarkable results in hair growth.
